

September 1, 2017 – Our offices and reception will be located on the 5th floor of the building starting the 1st of September 2017. We have increased the floor area in order to meet further requirements of our customers. This will enable us to set up and create more jobs so that we can continue supplying our customers quickly and efficiently.

Once again, we have a wave soldering machine on the 4th floor. This room also serves as a workshop and warehouse. Our new offices are located on the 5th floor.
